2018

- Started as a Core PHP developer working with PHP and MySQL.
- Developed and maintained basic websites and backend functionality.

SELECTED PROJECTS

Campit Outdoor Resort — Campspot Booking Integration
campitresort.com

Developed an on-site campground reservation system integrated with the Campspot booking platform, including dynamic availability, site selection, guest details, pricing with taxes and booking fees, shopping cart, and checkout/payment workflow. Integrated the booking experience into the Elementor-built WordPress website while maintaining a seamless user experience.

Viper Powerboats
viperpowerboats.com

Developed a custom boat configurator with dynamic color switching, conditional pricing based on selected options, and automated PDF generation including the configured boat image.

Arena Motor
arenamotor.es

Developed a custom ACF + WooCommerce bike configurator with AJAX-based real-time pricing, conditional component selection, and dynamic product updates.

Go Professional goprofessional.co.in

Developed a custom product subscription system and dynamic poster generation using WordPress and ACF, including user-specific poster creation and management.

Wylder Hotels wylderhotels.com

Developed a custom WordPress website using SCSS and Gulp.js, with responsive Gutenberg blocks, dynamic offer listings, and custom filters.

Klinik Atlas klinik-atlas.info

Implemented HTML DOM-based data scraping with scheduled monthly cron jobs and a Leaflet.js interactive map with detailed location popups.

Bloc Skincare blocskincare.com

Customized a Shopify theme and developed reusable content blocks to meet brand and responsive design requirements.

Premium WordPress Theme emlawtheme.asdasdasd.a2hosted.com

Developed a custom premium WordPress theme using ACF blocks, flexible layouts, multiple header/footer variations, and global color and font options.

HOTEL PROJECTS

Sea Bird Resort • Mission Pacific Hotel • LevelTen NYC • Hawks Cay • Casa Marcial • EAU Palm Beach • Equinox Spa
